

## **FAST AND EASY MAINTENANCE OF CONTROL PANELS**

### **CAMO® – Control Assembly Maintenance Option**

A second version of the CAMO® system is one for maintenance purposes only. Multiple stations can contain identical controls. The owner may have spare assemblies placed in storage and, when maintenance is required, the entire interior assembly can be rapidly switched out allowing the malfunctioning unit to be brought back to the repair location for overhauls -or- sent back to the manufacturer for repair -or- complete refurbishing. The systems are available for use in selected stainless steel, non-metallic, painted steel and explosion-proof enclosures.
